Bene-Bac™ Pet Gel

Contains live, naturally occurring microorganisms

- A concentrated live culture of seven fat encapsulated, microorganisms found in the intestinal tracts of small animals.
- Fat encapsulation insures the survival of the seven microorganisms through the stomach acids to the small intestine for maximum effect.
- A guaranteed 20 million colony forming units (CFU) per gram of viable, lactic acid producing bacteria.
- High energy - easily digested for instant energy: Dextrose for instant energy and Fat for sustainable energy.
- Help for pets under adverse conditions such as:
 - showing
 - grooming
 - breeding
 - weaning
 - traveling
 - boarding
 - birth
 - surgery
 - worming
 - antibiotic therapy
- A palatable gel in an easy to use syringe.

INDICATIONS FOR USE:

Recommended any time an animal experiences changing nutritional or environmental conditions. Give the indicated amount when a new pet arrives home. Also can be used when traveling (before departure and upon arrival), one to two hours after worming, at birth, prior to supplementing the newborn's diet with milk replacer, at weaning, when dietary changes occur or as indicated by your veterinarian when pets are treated with antibiotics.

If diarrhea or anorexia (loss of appetite) persist, contact your veterinarian.

DIRECTIONS FOR USE:

Newborns: Feed 1/2 gram at birth; 1/2 gram on days 3, 5 and 7 and at weaning. For hand fed orphans increase to 1 gram on days 7, 14 and at the introduction of solid food.

Post weaning/older: Feed 1 gram per 10 lbs. of body weight up to 40 lbs. For 50 lbs. of body weight or over use 5 grams.

Pocket pets and other small mammals: Feed 1/2 gram at birth, 1/2 gram on days 5 and 7.

These levels should be given before and after marked environmental changes. Two feedings, 3 days apart are recommended. Place gel directly into mouth.

INGREDIENTS:
