6 Raising a Healthy, Confident, and Athletic Puppy

Our sport has changed, and we need to change the way we prepare our dogs physically and mentally for a long and successful future in agility. By Dr. Debra Canapp and Susan Garrett

17 Understanding Collection and Extension

A common problem for enthusiastic young dogs is a lack of understanding of collection. As they pick up speed and enthusiasm, their stride gets longer, and turns get wider. Here are some training exercises to work on this skill. By Jo Sermon

29 The Three Hats of Agility, Part 4: The Competitor

Non-judgmental, realistic self-assessment is essential to improve in agility. What type of competitor are you, and what type do you want to be? By Sandy Rogers

43 Power Paws Skills: Line-ups, Heelwork & Circles

Teaching your dog to line up at your side, facing the same direction you are moving, is step one in establishing how you would like your dog to orient himself to you while moving through an agility course. By Nancy Gyes

Features

4 Tip of the Month – Does your dog scoot forward at the start line?

Here's a tip for making sure you know that your dog is still exactly where you placed him before you led out. By Kathy Mocharnuk

5 Editorializing: Feeling "Perky!" – Did you notice the digital "perks" when you read the February issue of the magazine? By Brenna Fender

11 The 25% Solution: Sequences for Small Spaces – This month's exercises give you a chance to work on "blind" tunnel entrances, a challenge that requires the dog to enter a tunnel from the end that's not visible during his approach, as well as practice with table performance. By John Reid

13 Team Small Dog Agility Humility: Comfy Slippers – When did my 5-year-old dog turn into my comfy slippers? She was crazy. She ran away. She chased anything that moved. I couldn't walk her on a leash. Forget about getting her running dogwalk feet to hit the yellow. By Laura Hartwick

22 Symmetry and How it Affects Your Dog's Performance – Have you ever looked at your dog and thought something was off? What if there were a couple of simple tests you could perform on your dog to know if he isn't balanced and that an injury might be brewing? By Carolyn McIntyre, PT

25 The Tandem Turn Out of the Weaves – The tandem turn out of the weave poles is a specific way to handle the exit of the weave poles that allows you to be well ahead of the dog so you can cue the next obstacle. By Kaitlyn Dreese

28 Interactive Course Map – Take a look at a course map and then watch a video discussion of the course as well as examples of different types of dogs running it. By Elaine Rinicker

32 Backyard Dogs – This month's courses provide you with exercises to progressively increase the distance and complexity of a backside problem to be solved by your dog. By David Bozak

35 Nothing to Lose – The fear of losing a Q tends to make us act with caution, play it safe. When that fear is removed, a burden is lifted and gives us the freedom to do those things that we may have never been willing to try otherwise. By Forest Hudson

36 Stays? In Agility? Really? – Stays are a function of the self-control necessary to channel the drive and energy of a high drive dog into focused teamwork and performance. By Terry Herman

41 Dealing with Things You Don't Want – Do you have a habit of focusing on what could go wrong, rather than planning for how you're going to make things go right? By Dr. Kathrine McAleese
