

MAX 200 DOG OBEDIENCE EQUIPMENT COMPANY

Thank you!

Thank you for purchasing your **bendable knuckles (Type II)** from Max200 Performance Dog Equipment, Inc.

Instructions for setting up the Weave-A-Matic

You should not be able to bend the knuckle when holding it in your hand. You will only be able to bend the knuckle when it is mounted on the base and the pole is installed on it.

Lay the weave pole base flat on the ground. Remove the screw from the bottom portion of the knuckle. Place the bottom portion of the knuckle onto the post on the base—line up the holes—replace the screw. Place the pole over the top of the knuckle and tilt the pole to the desired angle. Repeat this process for all 6 or 12 placements.

DO NOT TIGHTEN OR LOOSEN THE BOLTS HOLDING THE TWO HALVES OF THE KNUCKLE TOGETHER. DOING THIS WILL BREAK THE SEAL THAT WE HAVE CREATED TO KEEP THE BOLT FROM LOOSENING.

You are now ready to begin weaving.

If you have any questions, call (800) 446-2920. Happy weaving.
