

Sports Pet Pop-Open Crate Folding Instructions

Fold crate flat.

Tuck ends in.

Hold crate at 45° angle to body. One hand should have thumb facing up and the other should have fingers facing up so that you're ready to twist crate in opposite directions.

Twist the crate in opposite directions...

...while applying inward pressure.

The kennel will form three sections/folds.

The three sections/folds can be positioned one on top of the other, forming a circle.

When you're done, place the elastic band around the circle to secure the crate in a folded/storable position.
