

DIRECTIONS

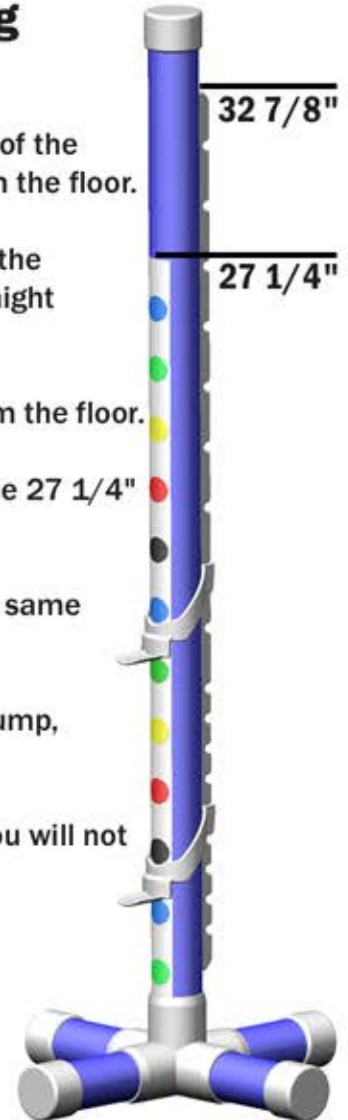

ATTACHING SLIDING JUMP CUPS

Instructions when using 1 1/4" PVC Pipe

1. Position the long strip along the outside of the jump with the top of the strip 33 1/2" from the floor.
2. Starting at the top, secure the strip with the provided screws. Make sure the strip is straight while working from the top to the bottom.
3. Mark the inside of the jump 27 7/8" from the floor.
4. Attach the number label starting from the 27 7/8" mark and working your way down.
5. Attach the second half of the strip in the same manner as the first.
6. Slide the large jump cup rings over the jump, two cups per side.
7. If your external end caps are glued on, you will not be able to replace your jump cup ring.
